What 30 g of protein looks like

Aim for 25 to 40 g of protein at each main meal. Here is roughly how much of each food gets you to 30 g. Values are approximate.

Food	Amount for ~30 g protein	Protein
Chicken breast, cooked	95 g / 3.4 oz	**30 g**
Lean beef (5%), cooked	115 g / 4 oz	**30 g**
Ground turkey (93%), cooked	115 g / 4 oz	**30 g**
Salmon, cooked	130 g / 4.6 oz	**30 g**
Shrimp, cooked	125 g / 4.4 oz	**30 g**
Light tuna, canned in water	1 can drained (about 120 g)	**28 g**
Sliced turkey breast	140 g / 5 oz	**30 g**
Eggs + egg whites	3 eggs + 120 ml whites	**32 g**
Nonfat Greek yogurt	300 g / 1 1/4 cups	**30 g**
Skyr	280 g / 1 cup	**30 g**
Low-fat cottage cheese	250 g / 1 cup	**30 g**
Whey protein	1 1/4 scoops (38 g)	**30 g**
Extra-firm tofu	220 g / 7.8 oz	**30 g**
Tempeh	160 g / 5.6 oz	**30 g**
Edamame, shelled	270 g / 2 cups	**30 g**
Lentils, cooked	330 g / 2 cups (carb-heavy)	**30 g**

General nutrition information, not medical advice.

3 QUICK WINS

Hit your protein goal without trying harder

1. Fix breakfast first

Most people eat 10 to 15 g at breakfast. A Greek yogurt bowl or two egg muffins with a shake gets you to 30 g in under 3 minutes.

2. Cook protein in bulk, twice a week

One tray of chicken and one pot of chili on Sunday covers most lunches and dinners until Wednesday.

3. Keep a backup shelf

Canned tuna, Greek yogurt, eggs, cottage cheese and protein powder. When the plan breaks, you still hit your number.
